

AVI OPTICAL LINK Enables Digital Ophthalmic Still Photography for both surgical and Slit Lamp diagnostics.

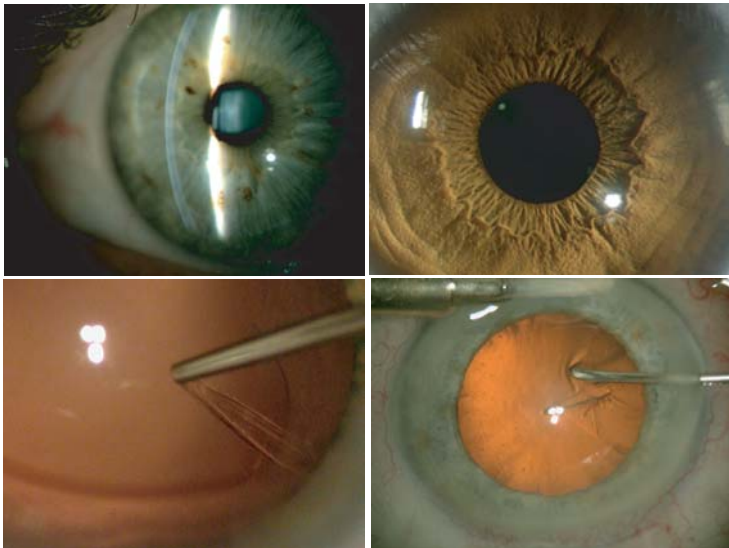

AVI Coolpix Optical LINK for all "C" Mount video adapters is made of original Nikon glass and Nikon coating for the finest quality digital image.

Together the **Nikon Coolpix** camera and the **AVI - 50** video adapter represent **the first Digital Image Composer** used on a surgical microscope and Slit Lamp. Independent controls of the adapter facilitate creating perfect images.

The AVI -50 digital image composer and the Nikon Coolpix camera produce publication quality pictures.

Features include:

- ROTATING MOUNT, left eye, right eye;
- Micro ZOOM and Camera Zoom;
- X-Y centering of image;
- TRUE Micro focus;
- Manual Aperture Iris;

Pictures taken with the AVI- 50 + Link and the Nikon Coolpix 990

AVI Coolpix adjustable Optical Link
For all "C" mounts adapters.
